Diagnostic and Operative Hysteroscopy Workshops
Joint RCOG/BSGE Meeting
Thursday 14 or Friday 15 June 2018
Venue: RCOG, London

Overview
The RCOG and BSGE are running two additional hysteroscopy workshop days for delegates who were unable to attend the hands-on sessions run as part of the hysteroscopy course in November 2017. In addition, there are likely to be spaces available for individuals who just wish to enhance their hysteroscopic surgical skills without attending the lecture day.

The workshops cover a range of both diagnostic and operative hysteroscopic surgery. Models and computer-simulated procedures are used covering skills for endometrial polypectomy, global endometrial ablation and hysteroscopic sterilisation.

Please note: the full Diagnostic and Operative Hysteroscopy Course will run in November 2018. Trainees who are undertaking, or wish to undertake, either of the relevant ATSMs will have the opportunity to book on the November course in advance of other delegates.

The workshops consist of:
- Delegates will attend a diagnostic hysteroscopy and resection station for the duration of 3 hours. The resection is with either the potato session or heart-model session for the development of diagnostic hysteroscopy skills, endometrial ablation and resection using electrosurgical tools. In addition, there will be an assessment of diagnostic hysteroscopy skills and a station for viewing examples and case studies.
- Rotation around a series of five stations, each of 40 minutes duration, covering skills for endometrial polypectomy, global endometrial ablation and hysteroscopic sterilisation.

Registration for this course includes one day of workshops on either Thursday 14 or Friday 15 June
The workshops run for 4 groups of delegates.
- Groups A and B start at 8.40am and finishes at 5.10pm on Thursday 14 OR Friday 15 June

Who Should Attend?
- Gynaecologists, whether Consultants, Staff Grade, Staff Doctors, Trust Doctors or Associate Specialists, wishing to enhance their hysteroscopy skills
- Trainees in Obstetrics and Gynaecology who are registered, or who plan to register, for the Benign Gynaecology or Hysteroscopy ATSMs. Please note, delegates are highly recommended to attend lectures and one hands on workshop sessions for ATSM purposes
- Nurse Hysteroscopists who are developing their operative hysteroscopy skills
- GPs with a special interest in gynaecology who wish to develop their hysteroscopic skills

After completing the course, you will be able to
- Be familiar with various devices available for performing operative hysteroscopic procedures including endometrial resection and ablation, endometrial polypectomy, fibroid resection and hysteroscopic sterilisation.
- Claim a maximum of 6 CPD credits for full attendance at this workshop

Course Organisers: Miss Mary Connor FRCOG, Sheffield
Mr Stephen Burrell MRCOG, Luton

Honorary Director of Conferences: Mr Nick Panay FRCOG, London
Honorary Deputy Director of Conferences: Mr Philip Toozs-Hobson FRCOG, Birmingham
PROGRAMME

WORKSHOPS
Thursday 14 or Friday 15 June

8.10am REGISTRATION AND REFRESHMENTS

GROUP A – GREEN BADGE

8.40am Workshop 1
Introduction to stations
Delegates will rotate through a series of five stations, each of 40 minutes durations consisting of: hysteroscopic sterilization; endometrial polypectomy with bipolar electrodes; morcellation of small submucosal fibroids and endometrial polyps; global endometrial ablation techniques; endometrial polypectomy with monopolar snares.

There are four delegates per station and they work in pairs.

8.50am STATION 1

9.30am STATION 2

10.10am STATION 3

10.50am REFRESHMENTS

11.10am STATION 4

11.50am STATION 5

12.30pm LUNCH (2 course standing lunch)

1.10pm Workshop 2
Introduction to diagnostic and resection stations

1.30pm PART 1 - Hands-on diagnostic hysteroscopy and case studies or resection stations
The workshop is divided into three sections with a refreshment break. Delegates will work in pairs and will work through each of the sections during the time available.

3.00pm REFRESHMENTS FOR GROUP A1 – A10
(Refreshments for Group A11 – A20 will be available on a self-service basis throughout the session)

3.10pm PART 2 - Resection stations or hands-on diagnostic hysteroscopy and case studies
Delegates move to the other half of the workshop.

5.10pm CLOSE
PROGRAMME

8.10am  
REGISTRATION AND REFRESHMENTS

GROUP B – RED BADGE

8.40am  
Workshop 1  
Introduction to diagnostic and resection stations

9.00am  
PART 1 - Hands-on diagnostic hysteroscopy and case studies/resection stations  
*The workshop is divided into three sections with a refreshment break. Delegates will work in pairs and will work through each of the sections during the time available.*

10.30am  
REFRESHMENTS  
*Refreshment time will be different according to the group: Group B1–B10 will have their break from 10.30 to 11am; Group B11–B20 will have their break from 10.40 to 11.10am*

11.00am  
PART 2 - Resection stations or hands-on diagnostic hysteroscopy and case studies  
Delegates move to the other half of the workshop.

1.00pm  
LUNCH (2 course standing lunch)

1.30pm  
Workshop 2  
Introduction to stations  
*Delegates will rotate through a series of five stations, each of 40 minutes durations consisting of: hysteroscopic sterilization; endometrial polypectomy with bipolar electrodes; morcellation of small submucosal fibroids and endometrial polyps; global endometrial ablation techniques; endometrial polypectomy with monopolar snares.*

There are four delegates per station and they work in pairs.

*Refreshments will be available on a self-service basis throughout the sessions.*
