This programme was correct at the time of going to print. The RCOG and Hampton Medical do not take any responsibility with having to make changes after going to print.

The RCOG World Congress 2019 will be enhanced by the voices of people who use O&G services, across many of the scientific sessions. We hope that these voices, both in person and pre-recorded, will add an extra element to the event, bringing focus to the human experience of women's health experiences relating to the topics being presented and the importance of woman-centred care across the specialty.
