

Female Pelvic Anatomy: Revised and Applied

Date: Thursday 27 June 2019

Venue: St Georges Hospital, London

Overview

In the same manner that we consider ourselves safe drivers, yet probably wouldn't pass a driving test, tomorrow, most surgeons consider themselves competent at surgery but would they pass an anatomy test, tomorrow? The aim of this one day refresher course is for senior clinicians to become reacquainted with the detailed anatomy of the human body as it relates to the practice of obstetrics and gynaecology.

This will take place through a mixture of revision lectures followed by practical sessions in the Dissecting Room where use will be made of cadavers, prosections and models. The day will begin with a 'spot test' requiring identification of anatomical structures marked with a pin. This test will be repeated at the conclusion of the course to confirm progress.

The 4 anatomical areas to be covered will be

- Pelvic girdle, anterior and posterior abdominal walls, inguinal canal and femoral triangle
- Pelvic floor and perineum
- Gastro-intestinal and urinary tracts in the pelvis
- Reproductive tract in the pelvis and other anatomical areas relevant to Obstetrics and Gynaecology

Throughout, the clinical relevance of the anatomy will be highlighted and any relevant embryology will be included.

Spaces limited to a maximum of 30 participants

Learning objectives

- Bony anatomy of the pelvis
- Anatomy of the pelvic floor and perineum
- Anatomy of the gastro-intestinal and urinary tracts in the pelvis
- Anatomy of the reproductive tract in the pelvis
- The basic embryology of the reproductive tract
- Clinical significance relating to the anatomy

Who should attend?

- Consultants gynaecologists and urogynaecologists
- Consultants with an interest in gynaecological oncology and laparoscopy
- Senior Trainees

Course Organiser: Mr Paul Carter FRCOG, London

Honorary Director of Conferences: Mr Philip Toozs-Hobson FRCOG, Birmingham

Honorary Deputy Director of Conferences: Mr Andrew Sizer FRCOG, Shrewsbury

PROGRAMME

9.00am	<i>REGISTRATION AND REFRESHMENTS</i>
9.30am	Welcome and introduction
9.45am	Spot test on cadaveric material
10.15am	Lecture 1: pelvic girdle, anterior and posterior abdominal walls
11.00am	<i>REFRESHMENTS</i>
11.30am	Practical session 1: pelvic girdle, anterior and posterior abdominal walls
12.00pm	Lecture 2: pelvic diaphragm and perineum
12.45pm	Practical session 2: pelvic diaphragm and perineum
1.15pm	<i>LUNCH (2 course standing fork lunch)</i>
2.00pm	Lecture 3: gastro-intestinal and urinary tracts in the pelvis
2.30pm	Practical session 3: gastro-intestinal and urinary tracts in the pelvis
3.00pm	<i>REFRESHMENTS</i>
3.30pm	Lecture 4: reproductive tract within the pelvis
4.00pm	Practical session 4: reproductive tract within the pelvis
4.30pm	Repeat spot test on cadaveric material
5.00pm	<i>CLOSE</i>
